oward, I don't know if this article from today's Post's Style Section will interest you or the Whites. After you have read it, please end it to them. If either of you wants to keep it, do, because my wn interest is minor, restricted to the CIA's manner of treating inor defectors. In some ways this resembles that of Oswald. The ame George Neagoy means nothing to me. Nor does Gionfriddo, which marked because his role is obvious and because it did not at the ime I came to it seem innocent. All the big powers' intelligence pparatushave too much to do to really care for or about the unimortant. If the CIA could lose this guy for two months, could not he same have happened with LHO in USSR? Liao was much more valuable han LHO could have been. HW 3/11/73
